DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 rejected under 35 U.S.C. 102(*b) as being anticipated by Schwartz (2398257).

Claim 1 is rejected under 35USC102(b) as being anticipated by Schwartz (2398257). Schwartz (2398257) discloses a chamber (1) by at least one wall containing graphics (the at least one wall being the surface including the graphics "CHEWING GUM"), a label (4-band having overlapping ends 9,10 secured together by any suitable adhesive- col.2, lines 45-50) removably affixed directly to said wall and said graphics (as indicated in figure 8 and col.2, lines 39-44-the band is removably slid as a tube over the package), the label being partially translucent so that a portion of said wall is visible underneath said label (col. 2,lines 12-26), the label and the wall containing graphics which complement each other (col. 2, lines 14-26), wherein said label contains graphics which form a first part of a scene and said wall contains graphics which form a second part of said scene which underlies the first part of said scene (col. 2, lines 14-26), and wherein said wall and said graphics adhered to said wall remain intact when said label is removed (as seen in figures 1 and 8).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz (2398257).

The examiner takes official notice of the use of the claimed elements. Such elements are notoriously old and well known in the art and their use would have been an obvious mechanical design expedient to a skilled artisan.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Willmon Fridle whose telephone number is 571 272 4476. The examiner can normally be reached on Monday - Thursday.
